

CORE DRILLING MACHINE TPD-Q20(S)

TPD-Q20(S) is a robust, compact, portable and reliable equipment for taking core samples from roads or installing barrier posts and different kind of bollards. The twin column drill stand with road bases makes it stable to work; equipped with ball screws for easier and smoother lifting; and the wheels at the bottom make it easy to move.

APPLICATIONS

- ⊙ Core sampling in asphalt and concrete pavements
- ⊙ Coring out of gate valves
- ⊙ Coring to place barrier posts or different types of bollards
- ⊙ Coring for airfield lightning
- ⊙ Coring to place crash barriers or fences

TECHNICAL SPECIFICATIONS

Motor	Honda GXV160
Power	4.0 kW (5.5 HP) / 3600 rpm 4-stroke
RPM	550-950rpm/min
Drilling stroke	600mm
Drill bit diameter	70-300mm
Drill bit connection	1-1/4 -7UNC
Water tank	8L
Dimensions	750*900*990mm
Weight	85kg
