

Platinum crucibles are widely used for XRF sample preparation, wet chemistry, ash testing, Loss on Ignition (LOI) because of their high melting temperature, oxidation and corrosion resistance. We provide platinum crucibles with the platinum $\geq 99.95\%$ and the specifications can be customized according to customer needs.

SPECIFICATION

Capacity (ml)	Top outer diameter (mm)	Bottom outer diameter (mm)	Height (mm)	Weight (g)
10	25	15	27	12
20	32	19	34	23
25	34	20	38	25
30	36	22	40	31
40	41	25	45	41
50	44	27	47	50
80	50	32	55	80
100	55	38	60	100
200	68	50	82	200
250	75	52	90	250
