

ASPHALT SOLVENT RECYCLER HS-1

This instrument is used to recover contaminated flammable solvents and can be used in conjunction with the asphalt centrifuge extractor as a recovery device for trichlorethylene or benzene. This instrument has a compact structure, light weight, is simple to operate and has a high degree of automation. It can be used in teaching, scientific research and pavement engineering construction supervision and other departments.

TECHNICAL SPECIFICATIONS

Temperature range	50~200°C
Voltage	220V
Power	1000W x 2
Recycling capacity	10L/h
Overall dimensions	610 x 460 x 550mm
Weight	18kg
