TINPENG

INTELLIGENT TILE BOND STRENGTH TESTER 6000C

Used to test the bonding strength of decorative bricks, tiles, mosaics, various plates, paints, coatings, exterior wall insulation materials (EPS panels, SPS panels), and also be used to test the bonding strength of various exterior wall building materials and adhesives.

FEATURES

- Built-in micro hydraulic system;
- Equipped with an embedded digital pressure gauge; Peak hold, data can be recorded, queried, deleted;
- The value of the 10-segment line correction improves the accuracy of the instrument;
- Low-power consumption design, will automatic shutdown if no operation, continuous working time can exceed 200 hours;
- High-definition 40x30mm with 320x240 resolution and high brightness capacitive touchscreen.
- Adopts touch screen + button control, and can display curves and directly read tensile force (kN) and strength (MPa) values.

TECHNICAL SPECIFICATIONS

Measuring range	0～10KN
Display	Mpa and Kn
Resolution	0.001kN/0.001MPa
Error	1%
Main material	Alloy material
Hollow cylinder stroke	10mm
Support span	125mm
Body weight	2.0kg
Data store	1000 items
Data check and delete function	Yes
Peak holding function	Yes
LCD lighting function	Yes
Battery	Lithium battery
Polyline correction	10-section
USB charging	Yes

PACKING LIST

Main frame	1 pc
Digital display instrument (built-in)	1 pc
Charger	1 set
Portable carrying case	1 pc
Standard block 95*45mm/40*40mm	Each 5pcs
AB glue	1 set
Operating manual	1pc
Quality certificate	1pc
Packing list	1pc
